SOFTWARE ENGINEER

Back-end Development | DevOps | Front-end Development

Reliable, energetic and resourceful software developer professional with over 2 years of experience developing software using different technologies. I'm results-driven with a relentless passion for crafting efficient and innovative solutions. My journey in the world of code began with a fascination for turning ideas into reality, and since then, I've honed my skills to become a versatile and adept professional.

WORK EXPERIENCE

Eridosolutions - Mombasa, *Kenya*   03/2022 - PRESENT

Full-stack Web Developer

Responsible for developing the company website.

- Developed back-end functionalities using Django framework to handle data processing, user authentication, and server-side rendering.
- Implemented front-end components and user interfaces using Vue.js to enhance user experience and interactivity.
- Designed and maintained MySQL database schema, ensuring efficient data storage and retrieval for website functionalities.
- Deployed the website on a Linux VPS using WSGI for Django application deployment and Nginx as a reverse proxy server for handling client requests.
- Implemented security measures and optimizations to ensure website performance, scalability, and reliability.
- Collaborated with cross-functional teams including designers and project managers to translate business requirements into technical solutions.
- Conducted code reviews, debugging, and testing to maintain code quality and ensure compliance with industry standards.
- Actively participated in team meetings, brainstorming sessions, and knowledge sharing initiatives to foster a collaborative and innovative work environment.
- Demonstrated problem-solving skills and attention to detail in resolving technical issues and implementing solutions to meet project deadlines.
